

SOHAN ANAND HANAGANDI

AI Product Manager · Builder

+1(857) 370-2511 | sohananandhanagandi@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI PM, 5 yrs across B2B SaaS, gaming, AI. Shipped multi-agent + RAG at Fabrix.ai for Tata Communications + 2 Fortune 500 accounts. Scaled PlayStation Dev Portal 5x. Now building multi-agent systems solo, end to end, with Claude.

EDUCATION

Northeastern University, MS, Project Management (Product & Technology Focus)
Gogte Institute of Technology, BE, Computer Science

Sep 2023 – Dec 2025
Aug 2016 – Mar 2020

EXPERIENCE

Product Manager | Community Dreams Foundation | Remote Feb 2026 – Present

- Shipped intake, triage, & document-generation AI agents to production across 2 Legacy products, replacing manual ops workflows with LLM pipelines. Owned the full stack from prompt engineering & pipeline orchestration to evaluation and monitoring
- Owning eval harness per agent (golden-set, LLM-as-judge); running blind comparisons against staff baselines before each rollout.
- Aligned 3 stakeholder groups on quarterly AI roadmap; unlocked engineering capacity for 2 priority initiatives.

AI Product Co-op | Fabrix.ai (fka CloudFabrix), Series A AIOps Platform | Pleasanton, CA Jan 2025 – Jul 2025

- Drove multi-agent orchestration for Tata Communications + 2 Fortune 500 accounts; cut onboarding ~10%.
- Shipped RAG pipelines (custom chunking, reusable retrieval); lifted golden-set eval relevance ~10pp.
- Replaced GPT-4 with fine-tuned open-source LLM in prod; held eval quality flat while cutting per-token cost.
- Caught at-risk enterprise accounts pre-value via telemetry; reprioritized backlog and shipped 4 fixes that closed renewal.

Product Manager | Sony Interactive Entertainment, PlayStation (\$28B Division, 120M+ MAU) Dec 2022 – Sep 2023

- Led 14-person cross-functional team scaling PlayStation Developer Portal from 800 to 4,000+ partners in 10 months.
- Diagnosed funnel drop-off in dev-portal onboarding; redesigned compliance workflow, cutting partner activation ~22%.
- Built SQL-backed ROI model that secured VP approval to expand into 2 regional markets.

Product Manager | Qlik Technology, B2B SaaS Analytics Platform Jul 2021 – Nov 2022

- Killed 2 features (\$250K pipeline) after <5% cohort adoption; redirected 4 engineers to retention, recovering \$285K ARR.
- Caught a 90-day churn spike in SQL/Mixpanel; shipped 2 targeted interventions, recovering \$180K ARR over 3 quarters.
- Ran vendor eval across 8 tools; surfaced 3 gaps that reshaped the roadmap and unlocked 2 enterprise wins (\$95K ACV).

Associate Product Manager | Qlik Technology, B2B SaaS Analytics Platform Jan 2020 – Jun 2021

- Caught drop-off at the config step in onboarding; redesigned activation with UX, cutting time-to-value.
- Ran 20+ customer discovery sessions; resolved 3 top friction points and lifted product satisfaction 2 quarters running.

PROJECTS

BrandBrief AI: RAG Template Matching Engine Live App | [Case Study](#) Mar 2026

- Hand-rolled RAG pipeline (no LangChain) on Supabase pgvector with Claude inference and rate-limited API layer.
- Deployed on Vercel with auth and error handling; serving live traffic at sub-3s p95 retrieval latency.
- Hit ~70% top-1 retrieval matching natural-language briefs to brand templates across 4,500+ records.

Kira AI: Production RAG Voice Agent | [Live on Portfolio](#) Jan 2026

- Hand-rolled RAG: custom pgvector schema on Supabase, OpenAI embeddings, Claude Haiku streaming inference.
- Built API layer with prompt guardrails, context windowing, and real-time voice streaming in TypeScript/React.
- Live on Vercel handling recruiter traffic with grounded retrieval and refusal logic for out-of-context queries.
- Built it because recruiters kept asking the same questions in every screen; now they talk to the agent first.

SKILLS

AI / ML	: LLMs, Agentic Workflows, Multi-Agent Orchestration, RAG, Fine-Tuning (SFT), Vector Embeddings, Function Calling, Structured Outputs, Guardrails, Voice Agents, MCP, Evals
AI Dev Stack	: Claude Code, Cursor, Anthropic / OpenAI APIs, pgvector, Supabase, LLM-as-Judge & Golden-Set Evals, Prompt Engineering, Streaming Inference
Product & Strategy	: 0→1 Product, PRDs, Backlog Prioritization, Roadmapping, A/B Testing, Release Management, OKRs, Cohort & Funnel Analysis, Activation & Retention, SaaS Metrics (ARR, NPS, Churn), Agile/Scrum
Data & Tooling	: SQL, Python (FastAPI, requests), TypeScript/React, Mixpanel, Amplitude, Productboard, Figma, Jira, GitHub
